

Corporate Marketing & Promotional Campaign Policy

POL-MKT-2025 | Version 2.0 | Corporate Communications

1. Policy Objective

This corporate policy governs the structure, approval process, and execution rules for all pricing discounts and customer promotional campaigns.

The marketing team must ensure all campaigns support brand integrity, drive sales volumes, and maintain profitability margins.

2. Campaign Rules & Setup

Every promotional campaign must specify start dates, end dates, target product categories, and discount percentages in the marketing database.

Standard campaigns (like the June Summer Savings or December Holiday Extravaganza) must have discount structures pre-tested in staging environments at least 48 hours before launch.

Discounts are limited to a maximum of 25% unless written authorization is obtained from the Chief Marketing Officer.

3. Brand Alignment

All ad copy and graphics must comply with the official brand style manual. Outbound emails must use approved customer segments to maintain high delivery rates and click-through metrics.
