

Standard Vendor & Supplier Service Level Agreement

CON-SUP-TEMPLATE | Procurement & Logistics

1. Scope of Agreement

This Master Supplier Contract governs all purchase orders and logistics transactions between the Company and its approved suppliers listed in the vendor registry.

The supplier agrees to manufacture and deliver products in accordance with agreed specifications, quality expectations, and packaging requirements.

2. SLA Lead Times & Delivery

Suppliers are required to ship goods within the negotiated Lead Time Days specified in the system registry. The delivery time window starts on the business day following receipt of the Purchase Order.

Failure to meet agreed lead times directly compromises inventory replenishment schedules and fulfillment center operations.

3. Penalty & Delay Clauses

If a supplier fails to deliver products within the designated lead time plus a grace period of 3 business days, the supplier will incur a penalty of 2% of the total purchase order value per delayed day.

Delays exceeding 10 business days will constitute a material breach of contract, allowing the Company to cancel the order and seek damages.
